Architects Engineers Planners

El Associates a leading architectural, engineering and construction services firm designing schools since 1935. Our firm has provided professional services for over 200 school districts in New Jersey, Pennsylvania and New York. Our K-12 design studio is dedicated to partnering with educators and school communities to provide healthy, energy efficient and creative learning environments for students.

What Our Clients Say About Us:

"El Associates' commitment to the Neptune Township School District went well beyond the normal expectations for a design firm. In addition to the energy efficient, environmentally sensitive design which resulted in the USGBC LEED Gold Certification for Summerfield Elementary School, El staff members were instrumental in assisting our professional staff in the development of the District's Green Schools Curriculum for students in grades K-12. El not only designed state-of-the-art, user friendly facilities which have already resulted in a positive impact on the District, they presented professional development workshops for staff members and have taught lessons to our students using the school and grounds as a living textbook."

David A. Mooij
Superintendent of Schools
Neptune Township Board of Education

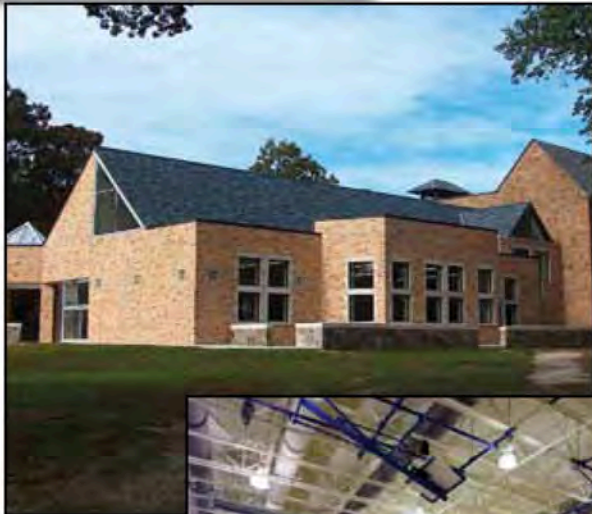

"El Associates worked very closely with our District to help generate community support for much needed roof and window replacement projects in these difficult economic times. Their professional staff coordinated all grant applications and submissions with state and local agencies and provided excellent support and monitoring during the construction phase of these projects."

Dina Messery
School Business Administrator
Hasbrouck Heights Board of Education

**Summerfield Elementary School,
NJ's 1st LEED® Gold Certified Public School**

Architecture >

Comprehensive design services for renovations and new construction, from the conceptual design phase through occupancy.

- Architecture
- Interior Design
- Site Master Planning
- Health & Safety Upgrades
- Alterations & Additions
- New Building Design
- LEED Certification / Sustainable "Green" Design
- Landscape Architecture
- Construction Administration

Engineering >

A full-service engineering staff with the complete range of skills required to meet the most challenging technical and engineering issues for every educational project.

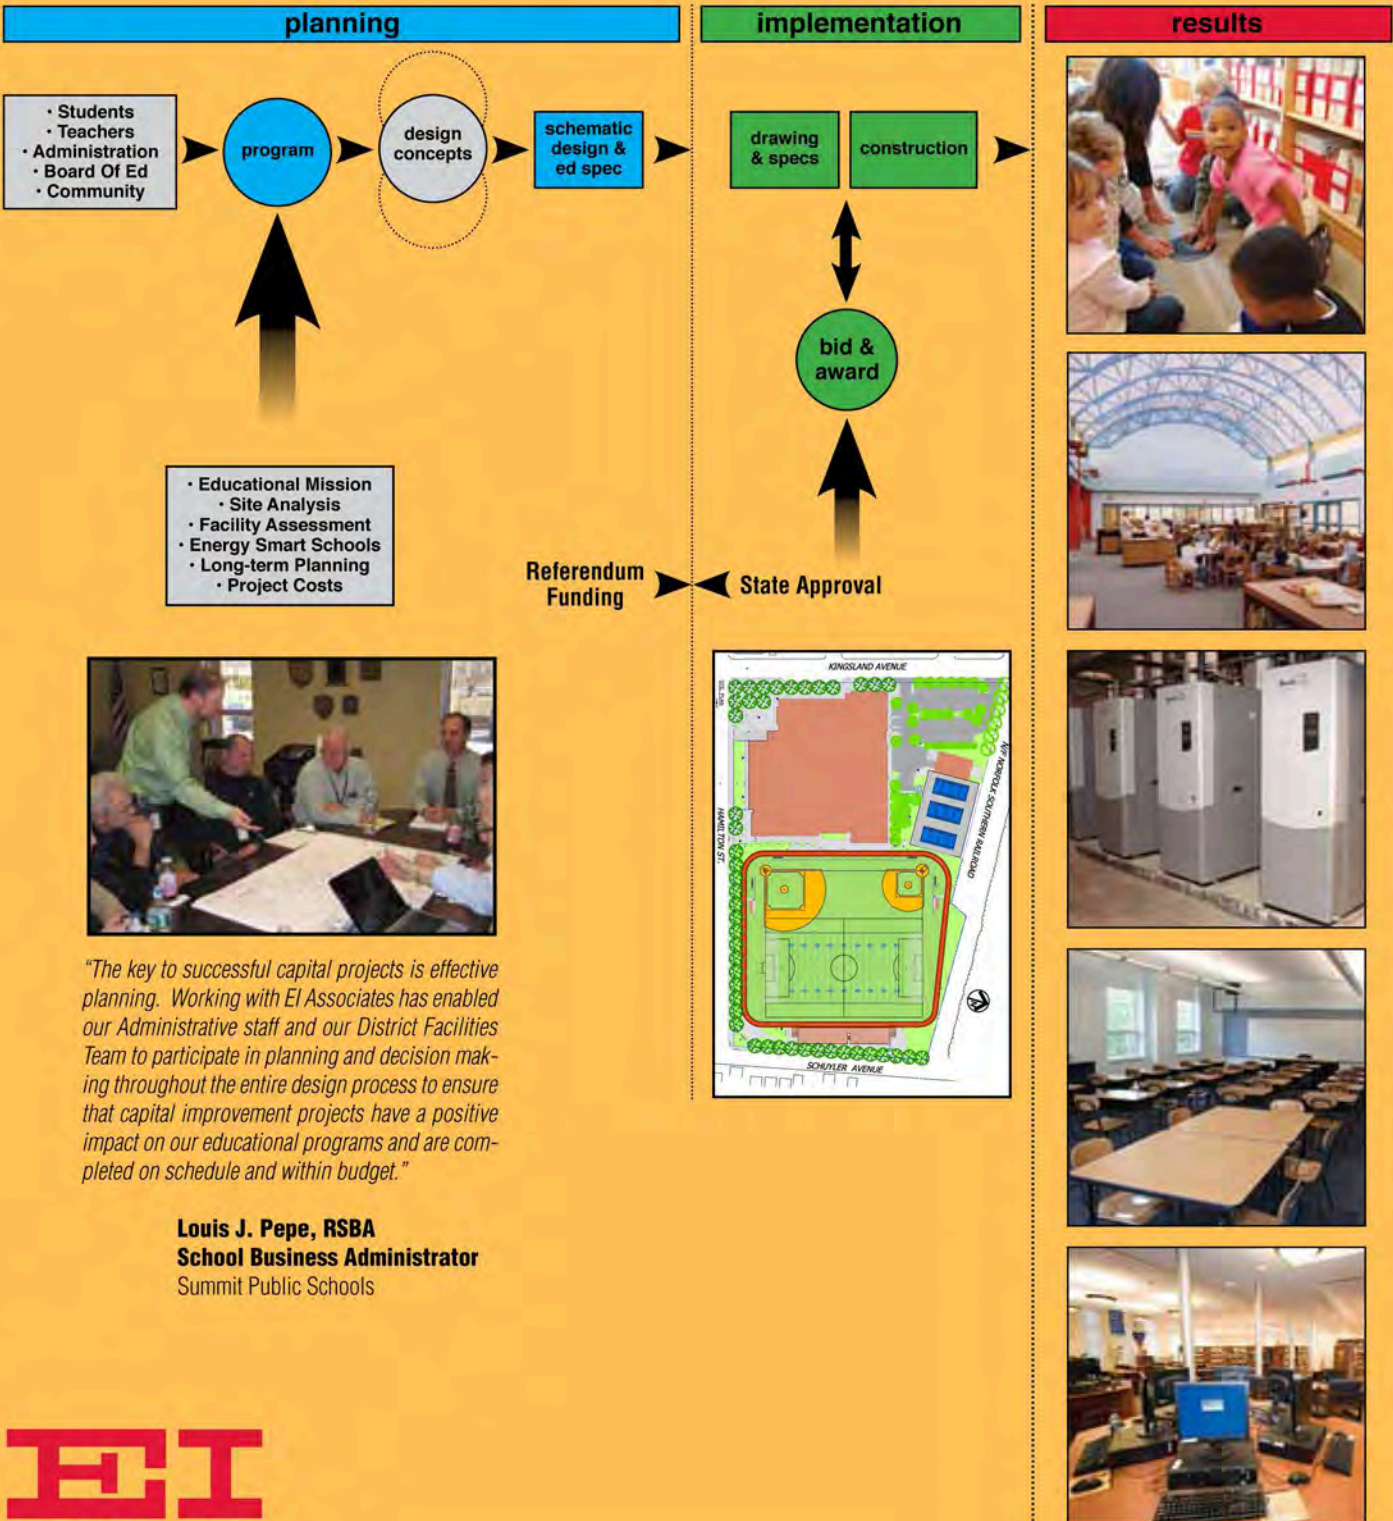

- Civil & Environmental
- Structural
- Mechanical (HVAC)
- Energy Management
- Plumbing and Fire Protection
- Electrical
- Information Technology
- High Performance Systems / Energy

Planning Services >

Complete planning services: program and design concept development, assistance with referenda, consensus building and approval processes.

- Feasibility Studies
- Master Planning
- Comprehensive Facility Assessment
 - Educational Program Adequacy
 - Physical Condition Survey
 - Energy Analysis
- Programming
- Code Analysis
- Educational Specifications
- State Approval Process
- Referendum Assistance
- Site Evaluation & Planning
- Cost Estimating

Educational Planning & Design Process

"The key to successful capital projects is effective planning. Working with EI Associates has enabled our Administrative staff and our District Facilities Team to participate in planning and decision making throughout the entire design process to ensure that capital improvement projects have a positive impact on our educational programs and are completed on schedule and within budget."

Louis J. Pepe, RSBA
