Architects Engineers Constructors

El Associates is a full service architectural, engineering, and construction firm providing creative, effective, and efficient project solutions to a broad spectrum of clients. Our firm has been delivering project excellence for the design and construction needs of our clients since 1944. From offices in the Northeast, our staff of 250 professionals provides the complete range of services and expertise necessary to turn ideas into action on assignments across North America.

Our client-focused project delivery method has resulted in the majority of our business coming from satisfied clients returning year after year and referring our firm to others. We have demonstrated experience in all types of corporate, industrial, educational, healthcare and institutional facilities design that is highly valued. Whether it is for a planning study or a multi-million dollar building program, our clients can depend on El to get the job done.

What Our Clients Say About Us!

"El has delivered a first class design for this challenging project. Our company is very pleased."

Colgate-Palmolive Project Manager

"The knowledge, experience, and energetic spirit of your staff continues to impress us."

BP Castrol Director of Design

"Our experience working with El Associates was excellent. Your team quickly mobilized, defined all the requirements and produced superior contract documents ahead of a tight schedule."

PANYNJ Construction Manager

Single Source Responsibility

Our client-focused Single Source Responsibility approach has delivered thousands of successful projects over our six decades in business. We have developed long-term relationships with many companies and organizations, large and small, who value our expertise and ability to provide a complete solution. Our Single Source Responsibility for architecture, engineering, and construction management makes completing projects easy for our clients.

Clients benefit from the broad range of services being offered by our company. Comprehensive services provided by a unified design & build team working under one roof enhances coordination during all project stages. Improved coordination speeds design delivery, produces high quality work, helps to control costs, and reduces project risks. Timely, cost-effective, high quality projects are the result.

Put EI to work for you.

Building is an investment of many resources. Money, people, technology, ideas and commitment are all necessary to deliver successful projects. Bringing together project resources with our clients in a team effort requires great skill and care. Our client's project goals are paramount in all phases of our work. EI's client focus means we always execute our professional services with the overall project objectives in mind. We listen carefully to the voice of all project stakeholders. Their input helps us to develop innovative, functional architectural, engineering and construction designs that efficiently serve each facility's purpose. From start to finish, we are committed to meeting our client's objectives. As we work together, you will see that EI's experts meet your objectives.
